

# Quality Statement

Al Nahdha has a business plan which contains its policy, system, program and plans for matters of Quality Assurance and Quality Control. Al Nahdha's Quality Plan represents an essential part of the company's policy and any deviation is seen as a serious breach of conduct. All the company's employees who may handle quality should be familiar with this plan.

## Objectives

**Al Nahdha endeavors through this plan to:**

- Continuously achieve, maintain and improve the quality of its supplies and performance in relationship to industry standards and customer requirements,
- Provide confidence to the customer that the requirements for quality are being or will be achieved in the final work,
- Satisfy its management by fulfilling, maintaining and continuously improving the requirements for quality.

## Implementation

**The above objectives are achieved through a dedicated team which makes sure that the goals are met through carefully developed procedures practiced during all phases of the execution of a project. Al Nahdha places particular emphasis on obtaining client satisfaction by:**

- Meeting the specification set by the client,
- Efficient, value- for-money construction
- Adherence to construction program and budgets
- Applying quality as an integral part of the company's procedures and manuals
- Allocation of the responsibility of the company's staff and setting out procedures which confirm and maintain the effectiveness of the quality system
- Application of the system which is based on the requirements of **ISO 9002:1994**
